Section 6 Lesson 8 Exercise 1: Sorting Data Using ORDER BY

Use the ORDER BY Clause to Sort SQL Results (S6L8 Objective 1)

In this exercise you will sort the order of the data that is returned in your query by adding an ORDER BY clause to the end of your SELECT statement.

1. Display the team name and number of players alphabetically in order of team name. Use an appropriate alias for your column headings.

The screenshot shows the APEX SQL Workshop interface. The SQL command area contains the following query:

```
1 SELECT name AS "Team Name",
2    number_of_players AS "Number of Players"
3 FROM teams
4 ORDER BY name;
```

The Results tab is selected, displaying a table with the following data:

Team Name	Number of Players
Celtics	42
Jets	10
Rockets	25
Rovers	8

4 rows returned in 0.01 seconds [Download](#)

2. Display the team name and number of players in descending order of number of players. Use an appropriate alias for your column headings.
